The well being of staff and offenders is a top priority for the agency and we remain committed to making sure that both are safe during the extreme heat.

TDCJ takes precautions to help reduce heat - related illnesses such as providing water and ice to staff and offenders in work and housing areas, restricting offender activity during the hottest parts of the day, and training staff to identify those with heat related illnesses and refer them to medical staff for treatment.

Although a detailed cost analysis has not been done, retrofitting facilities with air conditioning would be extremely expensive. It should be noted that medical, psychiatric, and geriatric units are air conditioned.

Below are some system wide protocols that units utilize during extreme heat.

*Provide additional water; ice is provided if available in the work and housing areas

*Restrict outside activity (work hours) in accordance with agency policy

*Ensure all staff and offenders working in areas of extreme heat (e.g., field, maintenance, yard squad) are provided frequent water breaks

*Transport offenders during the coolest hours of the day

*Screen outgoing offenders to ensure the selected mode of transportation is appropriate

*Load and unload transfer vehicles as quickly as possible

*Refill water coolers on buses at various times during the trip to maintain water at appropriate temperature

*When utilizing fans, air is drawn through the structure and exhausted outside, taking full advantage of the fresh air exchange system or prevailing winds to assist in the movement of air, as applicable

*Increase airflow by utilizing blowers, when appropriate, normally used to move hot air in the winter;

Plaintiffs' MSJ Appx. 6211

TDCJ010023

attach ribbons to vents to ensure blowers are being used appropriately

*Allow additional showers for offenders when feasible

*Allow offenders to wear shorts in dayrooms and recreational areas

*All custody levels are allowed fans.

*Train employees and offenders so they are aware of the signs and treatment for heat-related illnesses

*TDCJ staff and medical providers work closely together to identify offenders susceptible to heat related issues. A list of identified offenders is provided to housing officers who conduct frequent wellness checks on the offenders.

The agency strives to mitigate the impact of temperature extremes. Again, TDCJ is committed to making sure that offenders and staff are safe during the extreme heat.

All TDCJ facilities are accredited by the American Correctional Association (ACA); air conditioning is not required by the ACA for accreditation.

TDCJ does not discourage employees from filing Workers Compensation claims for any reason.

The Texas Civil Rights Project has filed wrongful death heat related lawsuits against the TDCJ. TDCJ does not comment on its response to actual or potential litigation.

Plaintiffs' Consolidated Summary Judgment Response Appendix

EXHIBIT 258

From: Robert Williams
To: Lannette Linthicum
Sent: 10/31/2013 4:23:42 PM
Subject: Fw: Life threatening conditions.

Dr Linthicum,

I like what Mr Echessa was trying to do in the message at the origin of this email train and agree that life-threatening conditions need to go offsite 911 without delay if medical is not onsite. Maybe HSD could help with the wording a bit to clarify the life-threatening conditions if CID wants to be enabled to decide between 911 and HUBs. Would you like for me to handle this or would you prefer to be involved?

Robert Lewis Williams, M.D.
Deputy Director, Health Services Division
Texas Department of Criminal Justice
Phone: (936) 437-3535

We are hearing quite a bit about this today. Are any of you hearing of similar directives through your TDCJ channels? Information being received is that patients complaining of these symptoms after hours will not be sent to a HUB they will be shipped 911. Seizures is notable from the list below (see bottom of email string).

Paul Brown, RN

UTMB providers and nursing -

If the Medical Department is closed on a Unit and the Security staff has a patient exhibiting one of the life threatening conditions below, they have been given the direction from the Regional Director to send the offender 911 to a local hospital. For those conditions they will NOT be moving the offender to J3/Hub.

The following are life threatening conditions as taught in our training academy.
Difficulty breathing
Chest pain.

Plaintiffs' MSJ Appx. 6216

TDCJ018085

Heavy bleeding.

Seizures.

Cool, pale or clammy skin with a decreased level of consciousness.

Red, hot or dry skin.

The Offender appears to be drunk.

Altered mental status.

If an Offender displays any of this symptoms and medical is off-site, call 911.

If ICS is initiated and the on scene commander is a correctional Officer, they will be empowered by you to call 911 via radio if medical is off-site.

Call if you have any questions.

Could we get a copy of this directive since apparently it will be system-wide. Some officers are under the impression they are to call 911 for every "seizure" regardless of whether the clinic is open or it is after hours.

Subject: 911 call

Mr. Dalecki,

Yesterday morning at Holliday 911 was called for an offender having a seizure. Warden Baggett called 911 prior to medical evaluating the offender. She stated that this was a new policy set forth during the regional warden's meeting recently. She described 7 criteria in which Wardens were advised to call 911 initially and then notify medical. I asked her for a list of these criteria but have not gotten it as of yet. I am sure this could have some negative effects on our budget and could be outside of our contract agreement. Can you provide any guidance on this matter?

In addition to the customary duties of coordinating provider services at all of the particular regions' units to facilitate the medical care of TDCJ offenders, ensuring appropriate attendance of providers, ensuring that they follow CMC treatment guidelines and follow the CMC formulary, and encouraging a managed health care focus in all of the regions' medical decisions and practices; Regional Medical Directors will be expected to accomplish the following:

Regional Medical Directors will:

1. Mentor and instruct providers with regard to CMC policies, restricting passes to only those that comply with our current pass guidelines, and familiarity with the CMC formulary.
2. Meet with unit Medical Directors on a monthly basis, over DMS/ conference call. Have minutes and submit.
3. Review provider productivity and work to enhance productivity. Discuss this topic at all team meetings that you attend and look for strategies that allow all disciplines to contribute.
4. Review all off site care and look for opportunities to educate those providers that require it.
5. The Regional Medical Director will not be assigned to unit call responsibilities but will be on call 24/7 for emergencies, etc. unless on vacation.
6. The Regional Medical Director will select a willing, unpaid (in addition to their regular salary) assistant who will be named the Assistant Regional Medical Director.
6. The Regional Medical Director will mentor and teach their assistant to be able to assume the Regional Medical Director's duties temporarily during the Regional Medical Director's absence and ultimately should be groomed to become the Regional Medical Director when the position becomes available. This would not be an automatic promotion, but would give an obvious advantage to that assistant in applying for the position.
7. Distribute written directives to unit providers, when requested to do so.
8. Respond to correspondence emanating from TDCJ Health Services, and routed through the Senior Medical Director-Outpatient Division's office.
9. Insure that requested CAPs are done in a timely manner.
10. Insure that providers complete all mandatory training on time.
11. Insure that any additional training mandated by the Physician Peer Review, is completed by the involved provider(s).
12. Insure all routine and random audits requested by the Senior Medical Director-Outpatient/Inpatient Division, are completed in a timely manner.
13. Work closely with Human Resources on all disciplinary proceedings and keep the Senior Medical Director informed before proceeding and upon completion.
14. Make frequent visits to the district units, as time and budget allow, and let our people know who you are. Listen to what they tell you.
15. Make suggestions for improvement to the senior management team whenever indicated.

16. With regard to our providers, everyone is expected to bring their "manners" to work. Do not allow demeaning, condescending behavior or "yelling" at others in your clinics. It's rude, it hurts our employee's feelings, and in a prison setting, can be very dangerous. Be very firm on this one. I believe this policy is called the "jerk-free zone", and I totally concur with it. If someone behaves that badly, they will not work out in our system anyway and the only variable is, how much damage that they are allowed to do before they depart....

17. You will not have direct patient care responsibilities, but I would encourage you to help out units that are short staffed, especially if they are near-by and for no more than one or two days/week. I would encourage this occasionally, just to stay abreast of any EMR changes that affect providers delivering care. It would be better for you to discover a pending train-wreck early on, before it becomes established and creates havoc. I would also ask that when visiting units, you might help them by discussing cases with the providers, and be available for questions/consults, etc. and to share your experience and wisdom with the unit staff.

CPA - TPASS Managed Contract No. 850-M1

Textiles, Fibers and Piece Goods

Detailed Specifications/Requirements

Item Description	Detailed Specifications														
850-24 Cotton Duck Fabric	<p>Material used in the manufacture of Flags.</p> <p>A. Colors: White, Red and Blue</p> <p>B. Basic Fabric Construction: Plain weave - Warp 80, Fill 30</p> <p>C. Just received word from the garment division manager that the garment division has not used wool in the blankets for at least 10 years. That is as long as he has worked in the garment division

C.F. Hazlewood Jr.

Galen,
The blankets were manufactured previously at the Jordan Unit in Pampa. Due to downsizing of the factories, this factory was closed and the blanket production line was moved to the Smith Unit Mattress Factory in Lamesa. The specs that Dr. Adams are correct and there is no wool in the blankets. He can contact Vicki Smithson at the factory at 806-872-6741 and she will be glad to answer any questions he may have about the blankets. Please let me know if I can help out any further!
Jamie :)
